Streamlining Financial Processes through Automation for DIS

Dansk Ingeniørservice A/S (DIS), a leading international knowledge company, recognized the need to automate their financial processes to manage their growing number of creditor invoices. Manual handling was becoming resource-intensive and inefficient. By implementing Tungsten ReadSoft Online, DIS streamlined invoice processing, reducing errors and saving time. This automation allowed employees to focus on strategic tasks, improving productivity and job satisfaction. The new system significantly enhanced operational efficiency and created a more engaging work environment.

Operational Bottlenecks

DIS faced significant challenges with the manual handling of creditor invoices, which required extensive routine work making it prone to errors. As the company grew, the volume of invoices increased substantially, making the manual process unsustainable. Employees were spending considerable time on data entry and invoice processing, which diverted their focus from more strategic and value-adding activities.

The growing workload highlighted the need for a more efficient and scalable solution. DIS realized that to maintain operational efficiency and support its continued growth, it needed to implement an automation solution to handle the increasing number of invoices accurately and swiftly. The move towards

automation was essential to improving productivity, reducing errors, and ensuring that financial processes remained smooth and effective.

Introducing Tungsten ReadSoft Online

Martin Lønsmann, BI Analyst at DIS, presented a business case for implementing Tungsten ReadSoft Online. The solution promised:

- ✓ A good match between investment and expected earnings
- ✓ Significant resource savings
- ✓ An expected return on investment (ROI) of approximately six months
- ✓ Quick access to support and realization of the solution
- ✓ A user-friendly design and scalability

Top Benefits for Dansk Ingeniørservice A/S

- ✓ **Resource Savings:** Significant reduction in manual invoice processing time.
- ✓ **Scalability:** Easily handles increasing volumes of invoices.
- ✓ **User-Friendly:** Intuitive design and easy access.
- ✓ **Quick ROI:** Expected return on investment in approximately six months.
- ✓ **Up-to-Date:** Always on the latest version with no need for upgrade projects.

We have been very happy with the whole process with Dynatos and would like to recommend to others, in fact we have already done so.

Martin Lønsmann, BI Analyst, DIS

Seamless Deployment

The implementation of Tungsten ReadSoft Online was swift and effective. The cloud-based solution provided easy access and was always up to date, eliminating the need for upgrade projects. Within three months, DIS saw a 50% reduction in invoice handling time, allowing employees to focus on more value-creating tasks. Users' involvement in streamlining the invoicing process was crucial to the project's success.

Realized improvements and efficiency gains

DIS now handles around 25,000 invoices annually and expects to reach 40-45,000 in the coming years.

Key benefits include:

- ✓ A 50% reduction in time spent on invoice handling
- ✓ Increased job satisfaction due to reduced routine work
- ✓ Scalability to accommodate future growth

Looking Ahead

DIS plans to continue leveraging Tungsten ReadSoft Online to manage its growing volume of invoices. The solution's scalability ensures that DIS can handle future increases in supplier invoices without additional administrative burden.

What can we do for you?
