

Transport

Jumbo Transport's switch to cloud-based invoice management gained them several benefits

Jumbo Transport is a modern transport and logistics company focused on quality and solutions for the benefit of Danish companies. The head office is located in Brøndby, and in Scandinavia today, there are 100+ employees in Brøndby, Brabrand, Malmö, Oslo, and the last shot at the Haderslev tribe.

In 2017, they distributed a small 100,000 shipments around Europe, which is expected to increase with their new South Jutland office. They try to avoid manual work with their customers as much as possible.

Therefore, they have several electronic solutions for receiving/sending orders, tracking, and payment files to and from the banks. They also use Tungsten AP Essentials to receive all vendor invoices.

As long-time users of Tungsten ReadSoft Invoices, we were a little lukewarm about a best-practice solution, but with Tungsten AP Essentials, we got more than expected.

Martin Erichsen, IT chef, Jumbo Transport

Why Tungsten AP Essentials?

Jumbo Transport finds that the many different formats in the invoice number and invoice date, which previously had to be optimized, are now handled automatically by Tungsten AP Essentials. Some of the features that the employees are pleased about are putting the invoice on hold, sending an e-mail around if things need to be clarified or investigated, and splitting invoices into several pages. PDF and XML invoices run side by side without any problems. Lastly, product lines are much easier to handle in Tungsten AP Essentials than in Kofax ReadSoft Invoices. You can just process the item lines in an invoice continuously; if you have missed something, "it's super," says Martin Erichsen.

Martin Erichsen mentions one thing that impressed

image: www.jumbotransport.nl

We wanted to get out of Tungsten ReadSoft Invoices. Dynatos had come on the field, and that made the difference. For us, it is about the supplier being professional and trustworthy and having good relations with the people at Dynatos; it made us feel safe.

him. A subcontractor sends monthly invoices containing all shipments for the previous month; we are talking about approx. Five hundred sixty item lines – after being run through 4–5 times, the invoice goes directly through without manual handling. Over

the years, Jumbo Transport has collaborated with suppliers to affix the agreed reference number on the invoice. This allows Tungsten AP Essentials to quickly interpret the number and automatically ensure the invoice is routed to the correct approver. This has made invoice handling smoother and much faster.

Top Benefits for Jumbo Transport

- ✓ Automated handling of various invoice formats (number and date).
- ✓ Ability to put invoices on hold and send emails for clarification.
- ✓ Easier splitting of invoices into several pages.
- ✓ Seamless processing of PDF and XML invoices.
- ✓ Improved handling of product lines compared to Kofax ReadSoft Invoices.
- ✓ Streamlined processing of large invoices, e.g., invoices with approximately 560 item lines, without manual handling.
- ✓ Quick interpretation and routing of invoices to the correct approver due to the agreed reference number.
- ✓ Smoother and faster invoice handling process overall.

Tungsten AP Essentials

Tungsten AP Essentials is the leading cloud solution for capturing, interpreting, and validating invoice data on Microsoft Azure. It is a standard, valuable solution for companies that want a high degree of automation, scalability, fast implementation, and a user-friendly interface.

Dynatos

Dynatos is a certified value-added partner authorized to distribute Tungsten Automation's licenses with associated implementation, support, and maintenance. Dynatos has an extensive dealer network in the Nordic region, which is always ready to advise and optimize financial processes. Dynatos today has over 70 dedicated employees who, combined, have more than 400 years of knowledge of the Tungsten portfolio. They continually strive to improve by combining expertise, new ideas, and innovative technology.

What can we do for you?

Dynatos | Measurable results. Noticeable impact.
